

Automated Decision Review Guidance

Guidance ID G-2026-05 | Version 1.0 | Internal working guidance | 2026-06-30

Use notice. This is an internally synthesized training document. Aurora Federation, Harbor State, Aster Legal, Matter Alpha, and every source cited here are fictional. It is not legal advice or a statement of current law.

Purpose

A governance path for automated scores, recommendations, or classifications used in employment, access, or customer-facing decisions.

Scope and boundary

This applies to a Matter Alpha triage model only as a hypothetical case study. It is not a production model approval and it does not replace human review.

Rule summary

Automation may support a decision only when the use is inventoried, the consequences are understood, a trained person can intervene meaningfully, and affected people have a practical review route.

Decision path

Step	Required action
1	Identify the decision Describe the outcome, affected group, material effect, and whether a person can meaningfully override it.
2	Screen the use Check for high-impact use, special-category signals, proxy variables, or consequential eligibility effects.
3	Test controls Document purpose limitation, data quality, explanation notice, human-review route, and contest mechanism.
4	Release gate A business owner may pilot only after Privacy Legal and Model Risk record a conditional approval.

Operating controls

Escalation trigger

Escalate before deployment when a score could deny a material opportunity, when testing shows disparate outcomes, or when an appeal cannot be handled by a trained reviewer.

Recordkeeping

Retain the decision inventory, input-data description, test results, reviewer training record, notices, appeal metrics, and approval conditions.

Roles and cadence

Business owner supplies complete facts and implements controls. Privacy Legal verifies the review path, decision rationale, and escalation. Records Management maintains retention evidence. Reassess on a material change, a new recipient or system, a control failure, or the scheduled annual review.

Fictional source register

Reference	Fictional use
Aurora Federation Privacy Framework, 2026 edition	Synthetic baseline for purpose limitation, accountability, and transfer review.
Harbor State Information Stewardship Rules, guidance note 4	Synthetic comparison point for notification, processor, and records controls.
Aster Legal Matter Alpha control register, 2026-06-30	Synthetic operational anchor for preservation target 42 and exception workflow.

Decision record minimum

Record the request or event, scope, facts relied upon, rule path, decision maker, conditions, escalation outcome, review date, and storage location. Do not include personal data, credentials, or privileged source material in this guidance record.
