

Incident Notification Threshold Guidance

Guidance ID G-2026-06 | Version 1.0 | Internal working guidance | 2026-06-30

Use notice. This is an internally synthesized training document. Aurora Federation, Harbor State, Aster Legal, Matter Alpha, and every source cited here are fictional. It is not legal advice or a statement of current law.

Purpose

A triage guide for deciding whether a synthetic privacy incident requires internal, regulator, or affected-person notification.

Scope and boundary

Matter Alpha case example: on 2026-06-30, a preservation collection identified an access anomaly involving 42 records. The example is fictional and no individual data is included.

Rule summary

Notification analysis starts from verified facts and documented risk, applies the fictional jurisdictional thresholds conservatively, and preserves any time-sensitive notification option while facts are still developing.

Decision path

Step	Required action
1	Contain and preserve Stop the exposure, preserve evidence, assign an incident lead, and protect the legal-hold population.
2	Establish facts Confirm data type, recipients, duration, reversibility, and credible likelihood of harm.
3	Apply thresholds Use the Aurora Federation and Harbor State fictional threshold matrix in the source register; document both outcomes.
4	Notify or close Obtain Incident Counsel sign-off on notices, deadlines, and a reasoned no-notice conclusion where applicable.

Operating controls

Escalation trigger

Escalate immediately for sensitive categories, large-scale access, suspected misuse, or any uncertain statutory clock. Do not wait for a final root cause to preserve a deadline.

Recordkeeping

Store the incident timeline, evidence log, threshold worksheet, draft and final notices, delivery proof, and closure memo in the Incident Register.

Roles and cadence

Business owner supplies complete facts and implements controls. Privacy Legal verifies the review path, decision rationale, and escalation. Records Management maintains retention evidence. Reassess on a material change, a new recipient or system, a control failure, or the scheduled annual review.

Fictional source register

Reference	Fictional use
Aurora Federation Privacy Framework, 2026 edition	Synthetic baseline for purpose limitation, accountability, and transfer review.
Harbor State Information Stewardship Rules, guidance note 4	Synthetic comparison point for notification, processor, and records controls.
Aster Legal Matter Alpha control register, 2026-06-30	Synthetic operational anchor for preservation target 42 and exception workflow.

Decision record minimum

Record the request or event, scope, facts relied upon, rule path, decision maker, conditions, escalation outcome, review date, and storage location. Do not include personal data, credentials, or privileged source material in this guidance record.
