

Data Minimization and Collection Review Guidance

Guidance ID G-2026-07 | Version 1.0 | Internal working guidance | 2026-06-30

Use notice. This is an internally synthesized training document. Aurora Federation, Harbor State, Aster Legal, Matter Alpha, and every source cited here are fictional. It is not legal advice or a statement of current law.

Purpose

A product and operational review for limiting collection, fields, access, and retention to a defined purpose.

Scope and boundary

This guidance is used by teams proposing new fields, telemetry, identity attributes, or vendor feeds. It does not approve collection by itself.

Rule summary

Collect only the fields demonstrably needed for a named purpose, reduce optional or unsupported fields, and configure access and deletion at the time of collection rather than as a later aspiration.

Decision path

Step	Required action
1	State the purpose Write one operational purpose and the decision it supports; reject broad future-use statements.
2	Challenge each field For every field, classify as necessary, useful but optional, or unsupported; remove unsupported fields.
3	Constrain access Set role-based access, a purpose-bound dataset, and a collection-off date.
4	Confirm deletion path Name the system owner and the tested deletion or de-identification action.

Operating controls

Escalation trigger

Escalate where the proposal includes precise location, persistent identifiers, employee data, or any field retained beyond the stated purpose.

Recordkeeping

Record the field inventory, necessity rationale, access design, retention setting, testing evidence, and reviewer decision in the Collection Review Log.

Roles and cadence

Business owner supplies complete facts and implements controls. Privacy Legal verifies the review path, decision rationale, and escalation. Records Management maintains retention evidence. Reassess on a material change, a new recipient or system, a control failure, or the scheduled annual review.

Fictional source register

Reference	Fictional use
Aurora Federation Privacy Framework, 2026 edition	Synthetic baseline for purpose limitation, accountability, and transfer review.
Harbor State Information Stewardship Rules, guidance note 4	Synthetic comparison point for notification, processor, and records controls.
Aster Legal Matter Alpha control register, 2026-06-30	Synthetic operational anchor for preservation target 42 and exception workflow.

Decision record minimum

Record the request or event, scope, facts relied upon, rule path, decision maker, conditions, escalation outcome, review date, and storage location. Do not include personal data, credentials, or privileged source material in this guidance record.
