

Journal Entry Sampling Report

Evidence ID CW-EV-2603-08 | CTRL-JE-05 | Owner: General Ledger Control | 2026-04-02

Objective

Evaluate evidence of review over manually posted Q1 journal entries.

Scope and method

A synthetic risk-based sample of 40 entries was selected from 312 Q1 manual entries using criteria for late posting, unusual description, and round amount.

Result

All 40 sampled entries carried an invented preparer role, reviewer role, and dated review status. Two documentation clarifications were resolved before close release; no uncorrected exception remained. Reviewer outcome: Accepted.

Metric	Value	Control expectation	Result	Evidence ID	Outcome
Population	312	Complete register	Agreed	CW-EV-2603-08	Accepted
Sample	40	Risk-based selection	Pass	CW-EV-2603-08	Accepted
Exceptions	0 open	No unresolved item	Pass	CW-EV-2603-08	Accepted

Synthetic internal audit evidence. No external records or personal data.
