

Close Control Reference

Synthetic Cedar Works internal reference | FY2026 Q1 | March 2026 close

Close timeline

Stage	Owner role	Minimum output
Day 0-1	Close Analyst	Trial balance extract, cutoff tracker, account ownership confirmation.
Day 2-3	Account preparer	Reconciliations, accrual support, revenue cutoff evidence.
Day 4	Finance Manager	Independent review, exceptions register, status of reversals.
Day 5	Controller	Materiality review, open-item decision, close sign-off.

Control checklist

1. Confirm posting dates and document dates for manual journals.
2. Reconcile cash, receivables, payables, inventory, revenue, and COGS to support.
3. Verify account 4000 cutoff evidence and account 5000 matching support.
4. Route items using the internal materiality tiers and retain approval evidence.
5. Record unresolved items with an owner, root cause, and target resolution date.

March anchor control

Cash control anchor: bank JPY 486.2m versus ledger JPY 498.6m is a JPY 12.4m unfavorable difference. It requires a completed bridge and controller-level routing.

Evidence quality

Evidence item	Reviewer test
Source reference	Matches ERP entry and controlled filename.
Preparation	Arithmetic, account, cost center, and period are supported.
Review	Reviewer role is independent and status is recorded.
Open item	Amount, owner, due date, and reporting impact are visible.

Sign-off rule

Close sign-off is permitted only when material items are resolved or explicitly approved as open under the Cedar Works internal materiality policy.
