

Operating Model Version History

Cedar Works | controlled release record

Release record

Version control is owned by the Finance Controller; changes require documented review before release.

Version	Date	Owner	Change
1.0	2026-04-06	Finance Controller	Initial FY2026 monthly operating model; four governed scenarios; Q1 actual anchors; cash variance bridge.

Change-control rules

Material changes to annual revenue, EBITDA, driver weights, scenario selection, or close anchors require an updated assumptions JSON, workbook review, refreshed validation report, and a new version row.

Approval roles

FP&A; approves planning inputs, Close Lead attests actuals, Treasury confirms the bank balance and bridge, and the Finance Controller releases the controlled model.
