ALPHA F1	PRECISION	RECALL	BETA F1

Decision context

This report records a bounded decision briefs evaluation on Product Alpha Q3 / Product Beta Q4. The 18.4% adoption population is synthetic. Product Alpha is retained as a research checkpoint, not as a deployment authorization.

Engineering interpretation

Aggregate improvement remains meaningful only with the frozen scoring policy. The review therefore keeps slice-level calibration, dataset lineage, and the comparison with Product Beta attached to run M-27.
