

RELIABILITY EVIDENCE REPORT

2026 07 14 Capacity Plan Checkout Demand Searchable Report Pdf Text

Audience	Capacity Planning and Checkout Operations
Owner	Checkout Operations
Review date	2026-07-14
Artifact	p02-full-014288
Incident	INC-260713 2026-07-13

Approved incident context

Northstar Transit Cloud | Checkout SVC-17 | incident INC-260713 | 2026-07-13

Checkout availability SLO: 99.95% over 30d; latency SLO: 99.0% below 400 ms. Remaining request-error allowance: error budget 2.4%.

Timeline: deployment 09:18 UTC; Q-07 warning 12,000 at 09:42; S2 09:47; rate limit 09:54; rollback approval 10:02; concurrency 10:11; Q-07 below 8,000/recovery 10:24; impact end 10:31; resolution 10:42 UTC; capacity headroom 31%.

Artifact p02-full-014288 / source p02-src-014288 / scope p02-primary-11. Synthetic training record; no customer data, credentials, secrets, or Kio claims.

Metric	Observed value
Capacity headroom	31%
Error budget remaining	2.4% request-error allowance
Foundation focus	queue-drain planning

Metric	Observed value
Review subject	2026 07 14 Capacity Plan Checkout Demand Searchable Report Pdf Text
Fingerprint	eb8c38bdb372b478

Closure-control review: 2026 07 14 Capacity Plan Checkout Demand Searchable Report Pdf Text

For 2026 07 14 Capacity Plan Checkout Demand Searchable Report Pdf Text, evidence docket p02-src-014288 / p02-full-014288 uses p02-full-003786 to test the 31% headroom claim against queue drain and remaining request-error allowance, with a specific lens on post-incident control verification and recurrence resistance. The review method is to test the declared scope boundary before interpreting a service signal. The evidence is scoped to capacity/reports, framed by measure.queue.drain-rate, rel.capacity.2026-q3, date.2026-07-14, and evaluated to compare the source row before approving a narrative. The removed queue-pressure guardrail allowed demand to exceed consumer concurrency; retry amplification increased Q-07 and produced Checkout latency and failures. Identity was load-degraded only, never the initiating cause.

Assigned actions

1. Checkout Operations: confirm that 2026 07 14 Capacity Plan Checkout Demand Searchable Report Pdf Text cites the current p02-full-003786 hash before distribution.
2. Capacity Planning and Checkout Operations: record the Plan Checkout Demand review outcome without changing the fixed incident causality; apply the post-incident control verification and recurrence resistance lens and retain the row-specific scope capacity/reports in the review record.
3. Platform Reliability: compare the source row before approving a narrative; test the declared scope boundary before interpreting a service signal; preserve the causal chain from removed queue-pressure guardrail through demand exceeding consumer concurrency and retry amplification to Q-07 and Checkout latency and failures; record Identity as load-degraded only, never the initiating cause.
