| Incident    | INC-260713   2026-07-13                   |

## Approved incident context

Northstar Transit Cloud | Checkout SVC-17 | incident INC-260713 | 2026-07-13

Checkout availability SLO: 99.95% over 30d; latency SLO: 99.0% below 400 ms. Remaining request-error allowance: error budget 2.4%.

Timeline: deployment 09:18 UTC; Q-07 warning 12,000 at 09:42; S2 09:47; rate limit 09:54; rollback approval 10:02; concurrency 10:11; Q-07 below 8,000/recovery 10:24; impact end 10:31; resolution 10:42 UTC; capacity headroom 31%.

Artifact p02-full-012338 / source p02-src-012338 / scope p02-primary-11. Synthetic training record; no customer data, credentials, secrets, or Kio claims.

| Metric                 | Observed value               |
|------------------------|------------------------------|
| Capacity headroom      | 31%                          |
| Error budget remaining | 2.4% request-error allowance |
| Foundation focus       | queue-drain planning         |

| Metric         | Observed value                                                       |

## Closure-control review: 2026 07 15 Capacity Plan Ingress Headroom Searchable Report Pdf Text

For 2026 07 15 Capacity Plan Ingress Headroom Searchable Report Pdf Text, evidence docket p02-src-012338 / p02-full-012338 uses p02-full-001233 to test the 31% headroom claim against queue drain and remaining request-error allowance, with a specific lens on owner handoff and escalation precision. The review method is to compare the selected component evidence with the incident timeline. The evidence is scoped to capacity/reports, framed by measure.queue.drain-rate, rel.capacity.2026-q3, date.2026-07-15, and evaluated to keep the impact window distinct from the resolution time. The removed queue-pressure guardrail allowed demand to exceed consumer concurrency; retry amplification increased Q-07 and produced Checkout latency and failures. Identity was load-degraded only, never the initiating cause.

### Assigned actions

1. Checkout Operations: confirm that 2026 07 15 Capacity Plan Ingress Headroom Searchable Report Pdf Text cites the current p02-full-001233 hash before distribution.
2. Capacity Planning and Checkout Operations: record the Plan Ingress Headroom review outcome without changing the fixed incident causality; apply the owner handoff and escalation precision lens and retain the row-specific scope capacity/reports in the review record.
3. Platform Reliability: keep the impact window distinct from the resolution time; compare the selected component evidence with the incident timeline; preserve the causal chain from removed queue-pressure guardrail through demand exceeding consumer concurrency and retry amplification to Q-07 and Checkout latency and failures; record Identity as load-degraded only, never the initiating cause.
