

# RELIABILITY EVIDENCE REPORT

2026 07 20 Capacity Plan Queue Throughput Searchable Report Pdf Text

|             |                                           |
|-------------|-------------------------------------------|
| Audience    | Capacity Planning and Checkout Operations |
| Owner       | Checkout Operations                       |
| Review date | 2026-07-20                                |
| Artifact    | p02-full-011188                           |
| Incident    | INC-260713   2026-07-13                   |

## Approved incident context

Northstar Transit Cloud | Checkout SVC-17 | incident INC-260713 | 2026-07-13

Checkout availability SLO: 99.95% over 30d; latency SLO: 99.0% below 400 ms. Remaining request-error allowance: error budget 2.4%.

Timeline: deployment 09:18 UTC; Q-07 warning 12,000 at 09:42; S2 09:47; rate limit 09:54; rollback approval 10:02; concurrency 10:11; Q-07 below 8,000/recovery 10:24; impact end 10:31; resolution 10:42 UTC; capacity headroom 31%.

Artifact p02-full-011188 / source p02-src-011188 / scope p02-primary-11. Synthetic training record; no customer data, credentials, secrets, or Kio claims.

| Metric                 | Observed value               |
|------------------------|------------------------------|
| Capacity headroom      | 31%                          |
| Error budget remaining | 2.4% request-error allowance |
| Foundation focus       | queue-drain planning         |

| Metric         | Observed value                                                       |

## Evidence reconciliation: 2026 07 20 Capacity Plan Queue Throughput Searchable Report Pdf Text

For 2026 07 20 Capacity Plan Queue Throughput Searchable Report Pdf Text, evidence docket p02-src-011188 / p02-full-011188 uses p02-full-002385 to test the 31% headroom claim against queue drain and remaining request-error allowance, with a specific lens on baseline-to-peak comparison and service impact framing. The review method is to test whether the metric table supports the stated action owner. The evidence is scoped to capacity/reports, framed by measure.checkout.peak-rps, rel.capacity.2026-q3, date.2026-07-20, and evaluated to treat a threshold crossing as a decision input, not a cause. The removed queue-pressure guardrail allowed demand to exceed consumer concurrency; retry amplification increased Q-07 and produced Checkout latency and failures. Identity was load-degraded only, never the initiating cause.

## Assigned actions

1. Checkout Operations: confirm that 2026 07 20 Capacity Plan Queue Throughput Searchable Report Pdf Text cites the current p02-full-002385 hash before distribution.
2. Capacity Planning and Checkout Operations: record the Plan Queue Throughput review outcome without changing the fixed incident causality; apply the baseline-to-peak comparison and service impact framing lens and retain the row-specific scope capacity/reports in the review record.
3. Platform Reliability: treat a threshold crossing as a decision input, not a cause; test whether the metric table supports the stated action owner; preserve the causal chain from removed queue-pressure guardrail through demand exceeding consumer concurrency and retry amplification to Q-07 and Checkout latency and failures; record Identity as load-degraded only, never the initiating cause.
