| Incident    | INC-260713   2026-07-13                   |

## Approved incident context

Northstar Transit Cloud | Checkout SVC-17 | incident INC-260713 | 2026-07-13

Checkout availability SLO: 99.95% over 30d; latency SLO: 99.0% below 400 ms. Remaining request-error allowance: error budget 2.4%.

Timeline: deployment 09:18 UTC; Q-07 warning 12,000 at 09:42; S2 09:47; rate limit 09:54; rollback approval 10:02; concurrency 10:11; Q-07 below 8,000/recovery 10:24; impact end 10:31; resolution 10:42 UTC; capacity headroom 31%.

Artifact p02-full-009515 / source p02-src-009515 / scope p02-primary-11. Synthetic training record; no customer data, credentials, secrets, or Kio claims.

| Metric                 | Observed value               |
|------------------------|------------------------------|
| Capacity headroom      | 31%                          |
| Error budget remaining | 2.4% request-error allowance |
| Foundation focus       | queue-drain planning         |

| Metric         | Observed value                                                   |

## Closure-control review: 2026 Q3 Capacity Plan Postgres Growth Searchable Report Pdf Text

For 2026 Q3 Capacity Plan Postgres Growth Searchable Report Pdf Text, evidence docket p02-src-009515 / p02-full-009515 uses p02-full-005586 to test the 31% headroom claim against queue drain and remaining request-error allowance, with a specific lens on consumer-capacity margin and demand movement. The review method is to cross-check the approved source against the operator handoff. The evidence is scoped to capacity/reports, framed by measure.queue.drain-rate, rel.capacity.2026-q3, period.2026-q3, and evaluated to record mitigation and recovery as different states. The removed queue-pressure guardrail allowed demand to exceed consumer concurrency; retry amplification increased Q-07 and produced Checkout latency and failures. Identity was load-degraded only, never the initiating cause.

### Assigned actions

1. Checkout Operations: confirm that 2026 Q3 Capacity Plan Postgres Growth Searchable Report Pdf Text cites the current p02-full-005586 hash before distribution.
2. Capacity Planning and Checkout Operations: record the Plan Postgres Growth review outcome without changing the fixed incident causality; apply the consumer-capacity margin and demand movement lens and retain the row-specific scope capacity/reports in the review record.
3. Platform Reliability: record mitigation and recovery as different states; cross-check the approved source against the operator handoff; preserve the causal chain from removed queue-pressure guardrail through demand exceeding consumer concurrency and retry amplification to Q-07 and Checkout latency and failures; record Identity as load-degraded only, never the initiating cause.

### Accepted foundation citation

Scope-local accepted foundation binding (consumed by this artifact):

Artifact ID: p02-full-005586

Source ID: p02-src-005586

Planned path:
