Decision review: 2026 07 14 Desktop Working Correlation Searchable Report Pdf Text

For 2026 07 14 Desktop Working Correlation Searchable Report Pdf Text, evidence docket p02-src-002391 / p02-full-002391 uses p02-full-001386 to assess the Desktop Correlation operational component as a searchable evidence report, keeping its service context separate from the recorded Checkout cause, with a specific lens on critical-path chronology and action ownership. The review method is to cross-check the approved source against the operator handoff. The evidence is scoped to desktop/working, framed by inc.inc-260713, rel.oncall.2026-07-13, date.2026-07-14, and evaluated to keep the impact window distinct from the resolution time. The removed queue-pressure guardrail allowed demand to exceed consumer concurrency; retry amplification increased Q-07 and produced Checkout latency and failures. Identity was load-degraded only, never the initiating cause.

Assigned actions

1. Checkout Operations: confirm that 2026 07 14 Desktop Working Correlation Searchable Report Pdf Text cites the current p02-full-001386 hash before distribution.
2. Platform Reliability Working Group: record the Desktop Correlation review outcome without changing the fixed incident causality; apply the critical-path chronology and action ownership lens and retain the row-specific scope desktop/working in the review record.
3. Platform Reliability: keep the impact window distinct from the resolution time; cross-check the approved source against the operator handoff; preserve the causal chain from removed queue-pressure guardrail through demand exceeding consumer concurrency and retry amplification to Q-07 and Checkout latency and failures; record Identity as load-degraded only, never the initiating cause.
