## Closure-control review: 2026 Q3 Desktop Working Handoff Generation Searchable Report Pdf Text

For 2026 Q3 Desktop Working Handoff Generation Searchable Report Pdf Text, evidence docket p02-src-002339 / p02-full-002339 uses p02-full-002702 to assess the Desktop Handoff Generation operational component as a searchable evidence report, keeping its service context separate from the recorded Checkout cause, with a specific lens on regional dependency context and containment. The review method is to cross-check the approved source against the operator handoff. The evidence is scoped to desktop/working, framed by team.platform-sre, rel.oncall.2026-07-13, period.2026-q3, and evaluated to accept only timestamped operational evidence. The removed queue-pressure guardrail allowed demand to exceed consumer concurrency; retry amplification increased Q-07 and produced Checkout latency and failures. Identity was load-degraded only, never the initiating cause.

## Assigned actions

1. Checkout Operations: confirm that 2026 Q3 Desktop Working Handoff Generation Searchable Report Pdf Text cites the current p02-full-002702 hash before distribution.
2. Platform Reliability Working Group: record the Desktop Handoff Generation review outcome without changing the fixed incident causality; apply the regional dependency context and containment lens and retain the row-specific scope desktop/working in the review record.
3. Platform Reliability: accept only timestamped operational evidence; cross-check the approved source against the operator handoff; preserve the causal chain from removed queue-pressure guardrail through demand exceeding consumer concurrency and retry amplification to Q-07 and Checkout latency and failures; record Identity as load-degraded only, never the initiating cause.
