Decision review: 2026 07 13 Postmortem Identity Cache Searchable Report Pdf Text

For 2026 07 13 Postmortem Identity Cache Searchable Report Pdf Text, evidence docket p02-src-013441 / p02-full-013441 uses p02-full-000183 to document Identity as load-degraded only and exclude it from initiating-cause attribution, with a specific lens on load-degradation classification and causal exclusion. The review method is to cross-check the approved source against the operator handoff. The evidence is scoped to documents/operations/postmortems, framed by inc.inc-260628, rel.recurrence.2026-q2, date.2026-07-13, and evaluated to retain the scope boundary in every action assignment. The removed queue-pressure guardrail allowed demand to exceed consumer concurrency; retry amplification increased Q-07 and produced Checkout latency and failures. Identity was load-degraded only, never the initiating cause.

Assigned actions

1. Identity On-Call: confirm that 2026 07 13 Postmortem Identity Cache Searchable Report Pdf Text cites the current p02-full-000183 hash before distribution.
2. Incident Review Board and Platform Reliability: record the Identity Cache review outcome without changing the fixed incident causality; apply the load-degradation classification and causal exclusion lens and retain the row-specific scope documents/operations/postmortems in the review record.
3. Platform Reliability: retain the scope boundary in every action assignment; cross-check the approved source against the operator handoff; preserve the causal chain from removed queue-pressure guardrail through demand exceeding consumer concurrency and retry amplification to Q-07 and Checkout latency and failures; record Identity as load-degraded only, never the initiating cause.
