| Incident    | INC-260713   2026-07-13                      |

## Approved incident context

Northstar Transit Cloud | Checkout SVC-17 | incident INC-260713 | 2026-07-13

Checkout availability SLO: 99.95% over 30d; latency SLO: 99.0% below 400 ms. Remaining request-error allowance: error budget 2.4%.

Timeline: deployment 09:18 UTC; Q-07 warning 12,000 at 09:42; S2 09:47; rate limit 09:54; rollback approval 10:02; concurrency 10:11; Q-07 below 8,000/recovery 10:24; impact end 10:31; resolution 10:42 UTC; capacity headroom 31%.

Artifact p02-full-003889 / source p02-src-003889 / scope p02-primary-01. Synthetic training record; no customer data, credentials, secrets, or Kio claims.

## Decision review: 2026 07 13 Reliability Runbook Database Failover Searchable Report Pdf Text

For 2026 07 13 Reliability Runbook Database Failover Searchable Report Pdf Text, evidence docket p02-src-003889 / p02-full-003889 uses p02-full-000385 to evaluate PG-04 failover evidence without introducing a second incident cause, with a specific lens on threshold timing and alert handoff. The review method is to test the declared scope boundary before interpreting a service signal. The evidence is scoped to documents/operations/runbooks, framed by svc.identity.svc23, rel.inc260713.timeline, date.2026-07-13, and evaluated to treat a threshold crossing as a decision input, not a cause. The removed queue-pressure guardrail allowed demand to exceed consumer concurrency; retry amplification increased Q-07 and produced Checkout latency and failures. Identity was load-degraded only, never the initiating cause.

## Assigned actions

1. Identity On-Call: confirm that 2026 07 13 Reliability Runbook Database Failover Searchable Report Pdf Text cites the current p02-full-000385 hash before distribution.
2. Platform Reliability and Checkout Operations: record the Database Failover review outcome without changing the fixed incident causality; apply the threshold timing and alert handoff lens and retain the row-specific scope documents/operations/runbooks in the review record.
3. Platform Reliability: treat a threshold crossing as a decision input, not a cause; test the declared scope boundary before interpreting a service signal; preserve the causal chain from removed queue-pressure guardrail through demand exceeding consumer concurrency and retry amplification to Q-07 and Checkout latency and failures; record Identity as load-degraded only, never the initiating cause.

## Accepted foundation citation

Scope-local accepted foundation binding (consumed by this artifact):  
Artifact ID: p02-full-000385  
Source ID: p02-src-000385
