Decision review: 2026 07 20 Capture Intake Telemetry Export Searchable Report Pdf Text

For 2026 07 20 Capture Intake Telemetry Export Searchable Report Pdf Text, evidence docket p02-src-008317 / p02-full-008317 uses p02-full-000528 to assess the Telemetry Export operational component as a searchable evidence report, keeping its service context separate from the recorded Checkout cause, with a specific lens on review-readiness and closure criteria. The review method is to test whether the metric table supports the stated action owner. The evidence is scoped to downloads/inbox, framed by dep.payments.q07, rel.archive.closed, date.2026-07-20, and evaluated to keep the impact window distinct from the resolution time. The removed queue-pressure guardrail allowed demand to exceed consumer concurrency; retry amplification increased Q-07 and produced Checkout latency and failures. Identity was load-degraded only, never the initiating cause.

Assigned actions

1. Observability: confirm that 2026 07 20 Capture Intake Telemetry Export Searchable Report Pdf Text cites the current p02-full-000528 hash before distribution.
2. Evidence Intake Reviewers: record the Telemetry Export review outcome without changing the fixed incident causality; apply the review-readiness and closure criteria lens and retain the row-specific scope downloads/inbox in the review record.
3. Platform Reliability: keep the impact window distinct from the resolution time; test whether the metric table supports the stated action owner; preserve the causal chain from removed queue-pressure guardrail through demand exceeding consumer concurrency and retry amplification to Q-07 and Checkout latency and failures; record Identity as load-degraded only, never the initiating cause.
