

RELIABILITY EVIDENCE REPORT

2026 07 15 Kubernetes Production Network Policy Searchable Report Pdf Text

Audience	Production Infrastructure and Checkout Operations
Owner	Checkout Operations
Review date	2026-07-15
Artifact	p02-full-000788
Incident	INC-260713 2026-07-13

Approved incident context

Northstar Transit Cloud | Checkout SVC-17 | incident INC-260713 | 2026-07-13

Checkout availability SLO: 99.95% over 30d; latency SLO: 99.0% below 400 ms. Remaining request-error allowance: error budget 2.4%.

Timeline: deployment 09:18 UTC; Q-07 warning 12,000 at 09:42; S2 09:47; rate limit 09:54; rollback approval 10:02; concurrency 10:11; Q-07 below 8,000/recovery 10:24; impact end 10:31; resolution 10:42 UTC; capacity headroom 31%.

Artifact p02-full-000788 / source p02-src-000788 / scope p02-primary-03. Synthetic training record; no customer data, credentials, secrets, or Kio claims.

Metric	Observed value
Component under review	Production Network Policy
Checkout availability SLO	99.95% over 30d
Error budget remaining	2.4% request-error allowance

Metric	Observed value
Review subject	2026 07 15 Kubernetes Production Network Policy Searchable Report Pdf Text
Fingerprint	4aefd1f48753f0bd

Evidence reconciliation: 2026 07 15 Kubernetes Production Network Policy Searchable Report Pdf Text

For 2026 07 15 Kubernetes Production Network Policy Searchable Report Pdf Text, evidence docket p02-src-000788 / p02-full-000788 uses p02-full-001967 to assess the Production Network Policy operational component as a searchable evidence report, keeping its service context separate from the recorded Checkout cause, with a specific lens on load-degradation classification and causal exclusion. The review method is to cross-check the approved source against the operator handoff. The evidence is scoped to infrastructure/kubernetes, framed by env.prod, rel.topology.260713, date.2026-07-15, and evaluated to retain the scope boundary in every action assignment. The removed queue-pressure guardrail allowed demand to exceed consumer concurrency; retry amplification increased Q-07 and produced Checkout latency and failures. Identity was load-degraded only, never the initiating cause.

Assigned actions

1. Checkout Operations: confirm that 2026 07 15 Kubernetes Production Network Policy Searchable Report Pdf Text cites the current p02-full-001967 hash before distribution.
2. Production Infrastructure and Checkout Operations: record the Production Network Policy review outcome without changing the fixed incident causality; apply the load-degradation classification and causal exclusion lens and retain the row-specific scope infrastructure/kubernetes in the review record.
3. Platform Reliability: retain the scope boundary in every action assignment; cross-check the approved source against the operator handoff; preserve the causal chain from removed queue-pressure guardrail through demand exceeding consumer concurrency and retry amplification to Q-07 and Checkout latency and failures; record Identity as load-degraded only, never the initiating cause.

Accepted foundation citation
