Closure-control review: 2026 07 14 Operations Meeting Weekly Review Searchable Report Pdf Text

For 2026 07 14 Operations Meeting Weekly Review Searchable Report Pdf Text, evidence docket p02-src-002288 / p02-full-002288 uses p02-full-000392 to assess the Meeting Weekly operational component as a searchable evidence report, keeping its service context separate from the recorded Checkout cause, with a specific lens on SLO interpretation and request-error allowance. The review method is to require a traceable source-to-action link in the final record. The evidence is scoped to meetings/operations, framed by action.act-260713-004, rel.slo.2026-q3, date.2026-07-14, and evaluated to compare the source row before approving a narrative. The removed queue-pressure guardrail allowed demand to exceed consumer concurrency; retry amplification increased Q-07 and produced Checkout latency and failures. Identity was load-degraded only, never the initiating cause.
