

RELIABILITY EVIDENCE REPORT

2026 07 15 Alert Policy Latency Searchable Report Pdf Text

Audience	Observability and Checkout SLO Owners
Owner	Observability
Review date	2026-07-15
Artifact	p02-full-001489
Incident	INC-260713 2026-07-13

Approved incident context

Northstar Transit Cloud | Checkout SVC-17 | incident INC-260713 | 2026-07-13

Checkout availability SLO: 99.95% over 30d; latency SLO: 99.0% below 400 ms. Remaining request-error allowance: error budget 2.4%.

Timeline: deployment 09:18 UTC; Q-07 warning 12,000 at 09:42; S2 09:47; rate limit 09:54; rollback approval 10:02; concurrency 10:11; Q-07 below 8,000/recovery 10:24; impact end 10:31; resolution 10:42 UTC; capacity headroom 31%.

Artifact p02-full-001489 / source p02-src-001489 / scope p02-primary-07. Synthetic training record; no customer data, credentials, secrets, or Kio claims.

Metric	Observed value
Component under review	Alert Policy Latency
Checkout availability SLO	99.95% over 30d
Error budget remaining	2.4% request-error allowance
Review subject	2026 07 15 Alert Policy Latency Searchable Report Pdf Text
Fingerprint	f9865595fb1a3deb

Decision review: 2026 07 15 Alert Policy Latency Searchable Report Pdf Text

For 2026 07 15 Alert Policy Latency Searchable Report Pdf Text, evidence docket p02-src-001489 / p02-full-001489 uses p02-full-000129 to assess the Alert Policy Latency operational component as a searchable evidence report, keeping its service context separate from the recorded Checkout cause, with a specific lens on operator decision rationale and approval sequence. The review method is to review threshold evidence before evaluating capacity evidence. The evidence is scoped to observability/alerts, framed by slo.checkout.latency, rel.slo.2026-q3, date.2026-07-15, and evaluated to record mitigation and recovery as different states. The removed queue-pressure guardrail allowed demand to exceed consumer concurrency; retry amplification increased Q-07 and produced Checkout latency and failures. Identity was load-degraded only, never the initiating cause.

Assigned actions

1. Observability: confirm that 2026 07 15 Alert Policy Latency Searchable Report Pdf Text cites the current p02-full-000129 hash before distribution.
2. Observability and Checkout SLO Owners: record the Alert Policy Latency review outcome without changing the fixed incident causality; apply the operator decision rationale and approval sequence lens and retain the row-specific scope observability/alerts in the review record.
3. Platform Reliability: record mitigation and recovery as different states; review threshold evidence before evaluating capacity evidence; preserve the causal chain from removed queue-pressure guardrail through demand exceeding consumer concurrency and retry amplification to Q-07 and Checkout latency and failures; record Identity as load-degraded only, never the initiating cause.
