Closure-control review: 2026 07 20 Operations Dashboard Identity Slo Searchable Report Pdf Text

For 2026 07 20 Operations Dashboard Identity Slo Searchable Report Pdf Text, evidence docket p02-src-001739 / p02-full-001739 uses p02-full-008370 to document Identity as load-degraded only and exclude it from initiating-cause attribution, with a specific lens on mitigation reversibility and enhanced-monitoring follow-through. The review method is to treat the component-specific control as a follow-up, not a cause. The evidence is scoped to observability/dashboards, framed by slo.telemetry.delivery, rel.slo.2026-q3, date.2026-07-20, and evaluated to accept only timestamped operational evidence. The removed queue-pressure guardrail allowed demand to exceed consumer concurrency; retry amplification increased Q-07 and produced Checkout latency and failures. Identity was load-degraded only, never the initiating cause.

Assigned actions

1. Identity On-Call: confirm that 2026 07 20 Operations Dashboard Identity Slo Searchable Report Pdf Text cites the current p02-full-008370 hash before distribution.
2. Observability Dashboard Owners: record the Dashboard Identity Slo review outcome without changing the fixed incident causality; apply the mitigation reversibility and enhanced-monitoring follow-through lens and retain the row-specific scope observability/dashboards in the review record.
3. Platform Reliability: accept only timestamped operational evidence; treat the component-specific control as a follow-up, not a cause; preserve the causal chain from removed queue-pressure guardrail through demand exceeding consumer concurrency and retry amplification to Q-07 and Checkout latency and failures; record Identity as load-degraded only, never the initiating cause.
