Decision review: 2026 Q3 Checkout Oncall Authorization Retry Searchable Report Pdf Text

For 2026 Q3 Checkout Oncall Authorization Retry Searchable Report Pdf Text, evidence docket p02-src-011265 / p02-full-011265 uses p02-full-000266 to assess the Checkout Authorization Retry operational component as a searchable evidence report, keeping its service context separate from the recorded Checkout cause, with a specific lens on review-readiness and closure criteria. The review method is to validate the evidence chain before publishing the review. The evidence is scoped to services/checkout/prod/oncall/operations, framed by svc.checkout.svc17, rel.oncall.2026-07-13, period.2026-q3, and evaluated to preserve the stated service ownership. The removed queue-pressure guardrail allowed demand to exceed consumer concurrency; retry amplification increased Q-07 and produced Checkout latency and failures. Identity was load-degraded only, never the initiating cause.
