Closure-control review: 2026 Q3 Checkout Oncall Database Failover Searchable Report Pdf Text

For 2026 Q3 Checkout Oncall Database Failover Searchable Report Pdf Text, evidence docket p02-src-001114 / p02-full-001114 uses p02-full-000330 to evaluate PG-04 failover evidence without introducing a second incident cause, with a specific lens on threshold timing and alert handoff. The review method is to review the owner action before accepting a metric conclusion. The evidence is scoped to services/checkout/prod/oncall/operations, framed by inc.inc-260713, rel.oncall.2026-07-13, period.2026-q3, and evaluated to preserve the stated service ownership. The removed queue-pressure guardrail allowed demand to exceed consumer concurrency; retry amplification increased Q-07 and produced Checkout latency and failures. Identity was load-degraded only, never the initiating cause.

Assigned actions

1. Checkout Operations: confirm that 2026 Q3 Checkout Oncall Database Failover Searchable Report Pdf Text cites the current p02-full-000330 hash before distribution.
2. Checkout On-Call and Platform Reliability: record the Database Failover review outcome without changing the fixed incident causality; apply the threshold timing and alert handoff lens and retain the row-specific scope services/checkout/prod/oncall/operations in the review record.
3. Platform Reliability: preserve the stated service ownership; review the owner action before accepting a metric conclusion; preserve the causal chain from removed queue-pressure guardrail through demand exceeding consumer concurrency and retry amplification to Q-07 and Checkout latency and failures; record Identity as load-degraded only, never the initiating cause.
