

RELIABILITY EVIDENCE REPORT

2026 07 13 Identity Oncall Cache Flush Searchable Report Pdf Text

Audience	Identity On-Call and Platform Reliability
Owner	Identity On-Call
Review date	2026-07-13
Artifact	p02-full-001438
Incident	INC-260713 2026-07-13

Approved incident context

Northstar Transit Cloud | Checkout SVC-17 | incident INC-260713 | 2026-07-13

Checkout availability SLO: 99.95% over 30d; latency SLO: 99.0% below 400 ms. Remaining request-error allowance: error budget 2.4%.

Timeline: deployment 09:18 UTC; Q-07 warning 12,000 at 09:42; S2 09:47; rate limit 09:54; rollback approval 10:02; concurrency 10:11; Q-07 below 8,000/recovery 10:24; impact end 10:31; resolution 10:42 UTC; capacity headroom 31%.

Artifact p02-full-001438 / source p02-src-001438 / scope p02-primary-06. Synthetic training record; no customer data, credentials, secrets, or Kio claims.

Metric	Observed value
Identity p95	286 ms below 350 ms
Checkout latency SLO	99.0% below 400 ms
Component control	cache-flush safety review

Metric	Observed value
Review subject	2026 07 13 Identity Oncall Cache Flush Searchable Report Pdf Text
Fingerprint	036d98661977b8b1

Decision review: 2026 07 13 Identity Oncall Cache Flush Searchable Report Pdf Text

For 2026 07 13 Identity Oncall Cache Flush Searchable Report Pdf Text, evidence docket p02-src-001438 / p02-full-001438 uses p02-full-002758 to review cache-flush safety as a mitigation detail while preserving the established incident cause, with a specific lens on queue-drain proof and recovery-window closure. The review method is to test the declared scope boundary before interpreting a service signal. The evidence is scoped to services/identity/prod/oncall/operations, framed by inc.inc-260713, rel.oncall.2026-07-13, date.2026-07-13, and evaluated to treat a threshold crossing as a decision input, not a cause. The removed queue-pressure guardrail allowed demand to exceed consumer concurrency; retry amplification increased Q-07 and produced Checkout latency and failures. Identity was load-degraded only, never the initiating cause.

Assigned actions

1. Identity On-Call: confirm that 2026 07 13 Identity Oncall Cache Flush Searchable Report Pdf Text cites the current p02-full-002758 hash before distribution.
2. Identity On-Call and Platform Reliability: verify cache-flush controls do not alter the recorded Checkout causal chain; apply the queue-drain proof and recovery-window closure lens and retain the row-specific scope services/identity/prod/oncall/operations in the review record.
3. Platform Reliability: treat a threshold crossing as a decision input, not a cause; test the declared scope boundary before interpreting a service signal; preserve the causal chain from removed queue-pressure guardrail through demand exceeding consumer concurrency and retry amplification to Q-07 and Checkout latency and failures; record Identity as load-degraded only, never the initiating cause.
