Closure-control review: 2026 07 15 Identity Oncall Rate Limit Searchable Report Pdf Text

For 2026 07 15 Identity Oncall Rate Limit Searchable Report Pdf Text, evidence docket p02-src-007963 / p02-full-007963 uses p02-full-001985 to separate rate-limit control timing from the initiating queue-pressure change, with a specific lens on consumer-capacity margin and demand movement. The review method is to treat the component-specific control as a follow-up, not a cause. The evidence is scoped to services/identity/prod/oncall/operations, framed by inc.inc-260713, rel.oncall.2026-07-13, date.2026-07-15, and evaluated to treat a threshold crossing as a decision input, not a cause. The removed queue-pressure guardrail allowed demand to exceed consumer concurrency; retry amplification increased Q-07 and produced Checkout latency and failures. Identity was load-degraded only, never the initiating cause.

Assigned actions

1. Identity On-Call: confirm that 2026 07 15 Identity Oncall Rate Limit Searchable Report Pdf Text cites the current p02-full-001985 hash before distribution.
2. Identity On-Call and Platform Reliability: confirm the rate-limit control was a mitigation, not an initiating cause; apply the consumer-capacity margin and demand movement lens and retain the row-specific scope services/identity/prod/oncall/operations in the review record.
3. Platform Reliability: treat a threshold crossing as a decision input, not a cause; treat the component-specific control as a follow-up, not a cause; preserve the causal chain from removed queue-pressure guardrail through demand exceeding consumer concurrency and retry amplification to Q-07 and Checkout latency and failures; record Identity as load-degraded only, never the initiating cause.
