

Personal Recruiting Weekly Review

Working notes for Requisition Alpha | 18 Aug 2026 | Synthetic planning reference

Role	People Analytics Partner
Hiring capacity	3 openings
Published range	JPY 7.2-8.4M
Review lens	Consistent evidence, candidate experience, and calibration readiness

This is a planning aid, not a record of real recruiting activity. Candidate references use internal synthetic IDs only.

What to carry forward

Keep the evaluation conversation anchored to the role scorecard: practical people analytics partnership, clear stakeholder translation, and sound judgment about adoption. The recurring signal to protect is not speed by itself; it is whether each stage leaves a candidate with a clear next step and a consistent view of the role.

Candidate ID checkpoints

Candidate ID	Current working question	Next respectful action
C-ALPHA-07	Can the example distinguish insight from implementation?	Use one comparable follow-up prompt.
C-ALPHA-12	Is the partnership example scoped to an ambiguous stakeholder need?	Invite a structured written reflection.
C-ALPHA-19	Does the case response show prioritisation across competing requests?	Calibrate evidence against the shared rubric.

Next review habit

Before the next working session, note the evidence that changed the team's confidence, the question that remains unanswered, and whether the handoff language is understandable to someone joining late. That small discipline should make the three-opening plan easier to compare without turning people into a ranking exercise.
