

Compensation Band Guide

Orchid People | Effective 2026-08-18 | Internal governance reference

Purpose

This guide describes a synthetic, role-level compensation band system for consistent requisition planning. It does not set individual pay or promise a particular outcome.

Band reference

Band J: JPY 7.2M to 8.4M, midpoint JPY 7.8M. Requisition Alpha, People Analytics Partner, has 3 planned openings.

Band P: JPY 5.8M to 6.8M, midpoint JPY 6.3M. Requisition Beta, Talent Operations Specialist, has 2 planned openings.

Range calibration

Comparatio is proposed anchor divided by band midpoint. Range penetration is proposed anchor less minimum divided by maximum less minimum. Use both indicators together with documented business context.

A planning position outside the 35% to 65% corridor routes to People Ops and Finance review. A separate 5% midpoint corridor flags above- or below-midpoint review.

Governance notes

Use only aggregated, synthetic market reference values in this example. Refresh approved inputs before operational use.

Internal approval routing is a governance control, not a statement of legal compliance.
