

Pay Transparency FAQ

Orchid People | Internal reference | Effective 2026-08-18

What does this reference communicate?

It communicates role-level bands, band midpoints, and the internal review logic used for requisition planning. It is intentionally limited to synthetic and aggregated figures.

What does it not communicate?

It does not include individual pay, candidate salary history, employee data, names, contacts, identifiers, or a promise of any offer outcome.

How is a proposed anchor reviewed?

The proposed anchor is compared with the band minimum, midpoint, and maximum. Range penetration and comparatio are formula-driven planning indicators.

A position outside the stated planning corridor routes for People Ops and Finance review with a documented rationale.

What should be retained?

Retain role-level requisition rationale and approval evidence according to internal retention direction. Do not create person-level compensation dossiers from this guide.

Orchid People internal reference | Synthetic, aggregated examples only | Effective 2026-08-18
