

Interviewer Handbook

Prepared 2026-08-18 | Requisition Alpha | People Analytics Partner | 3 openings | JPY 7.2-8.4M

The role standard

Use structured, role-relevant questions and comparable prompts. Capture observable evidence before discussion.

Competencies

Analytics judgment: frame the decision, explain the method, and name a trade-off.

Stakeholder partnership: align different priorities with clear communication.

Practical delivery: turn insight into useful action.

Anchors

1 limited evidence; 2 emerging evidence; 3 demonstrated relevant evidence; 4 strong and repeatable evidence.

Fairness and bias interruption

Avoid questions about personal attributes or circumstances.

Pause: what evidence supports this? Compare: did we ask a comparable question? Reset: re-read the anchor.

Decision calibration

Silent score, evidence round, anchor check, documented rationale. Cross-reference the Facilitator Guide and Participant Workbook.
