

Candidate Experience Guide

Prepared 2026-08-18 | Requisition Alpha | People Analytics Partner | 3 openings | JPY 7.2-8.4M

Set expectations

Share the interview purpose, structure, duration, and next-step timing. Use plain language and respectful, role-focused framing.

Conduct a fair conversation

Use planned competency questions. Give candidates comparable opportunities to respond and ask questions. Do not seek personal information unrelated to the role.

Close with clarity

Thank the candidate, state the next step without promising an outcome, and make follow-up communications timely and professional.

Use the training system

See 02 Interviewer Handbook for scoring anchors, 00 Structured Interview Training for the overview, and 05 Participant Workbook for the interview checklist.
