

Orchid People Performance Program Summary

H1 2026 | Synthetic records only | Review date 2026-08-18

Program purpose

This summary documents a privacy-safe synthetic performance-cycle exercise. It supports calibration process design and workbook auditability; it is not a personnel, compensation, or decision record.

Cycle snapshot

Measure	H1 2026 synthetic result
Records	36 pseudonymous SYN-E records
Ratings	5: 5 4: 17 3: 11 2: 3 1: 0
Outcomes	Ready: 5 Confirm: 17 Develop: 11 Support: 3
Goal status	On track: 16 Progressing: 17 Support needed: 3

Operating principles

- Use stable synthetic IDs and team labels only.
- Base ratings on documented outcomes and goal progress.
- Keep workbook calculations formula-driven and reconcile totals.
- Exclude names, contacts, actual employee IDs, pay, health, demographics, protected traits, and other sensitive fields.

Artifacts

The companion dataset, goal-progress export, cycle tracker, calibration analysis, manager guide, retrospective, and data dictionary use the same 36-record synthetic population and rating distribution.

Interpretation note

The distribution is illustrative. It does not describe actual employees, compensation decisions, or organizational performance.
