

Interview readiness brief

Panel preparation | Requisition Alpha | Synthetic training artifact

Interview design

Run a 45-minute structured interview: five-minute context, three competency prompts, one work scenario, and consistent close.

Core prompts

How would you turn an ambiguous people question into a measurable decision?

How would you explain a limitation in a workforce metric to a nontechnical partner?

How would you protect appropriate access while keeping a decision process usable?

Panel safeguards

Use candidate IDs only. Capture observable evidence, not impressions. Do not discuss identity, background, or compensation history.
