

Structured question bank - People Analytics Partner

Orchid People | Requisition Alpha | People Analytics Partner | Tokyo hybrid | 18 Aug 2026 | Approved role range JPY 7.2-8.4M

Use instructions

Ask each core question verbatim, allow equivalent clarifying follow-ups, and record observable evidence rather than impressions.

Analytical partnership

- Describe how you would turn a workforce question into a measurable decision. What would you clarify first?
- How would you explain a trade-off between speed, accuracy, and stakeholder confidence?

Stakeholder influence

- How would you align People and Finance when their definitions of a metric differ?
- Give a structured approach for moving a reluctant leader from a request to an agreed action.

Responsible data practice

- What minimum data would you use for a retention analysis, and what would you exclude?
- How would you test whether a recommendation may create an unfair impact?

Execution

- Walk through a 30-day plan from ambiguous intake to an adopted dashboard or decision brief.
- What quality check would you run before communicating an insight?

Scoring reminder

Score 1-5 against the published anchors. A strong answer includes a specific method, explicit trade-off, and responsible handling of uncertainty.
