

Requisition Beta - synthetic profile set

Talent Operations Specialist | Opened 2026-08-11 | Tokyo hybrid | 2 openings | JPY 5.8-6.8M

Purpose

This synthetic set supports a fictional internal shortlist discussion. It contains candidate IDs only; no personal data, resumes, contacts, addresses, salary histories, or employee identifiers are included.

Role signals

Capability	Observable evidence expected
Pipeline operations	Reliable stage hygiene, handoffs, and exception follow-up
Candidate experience	Clear status updates and considerate workflow design
Hiring partnership	Practical decision support and calibrated escalation
Data fluency	Funnel definitions, quality checks, and action-oriented reporting

Profile overview

ID	Current assessment	Evidence summary	Next action
B01	Panel recommended	Strong operating cadence; combines structured intake hygiene with candidate communication judgment.	Panel conversation; confirm hybrid collaboration preference.
B02	Screen recommended	Clear stakeholder management and practical process metrics orientation.	Structured screen; probe data quality examples.
B03	Screen recommended	Thoughtful candidate experience lens with measurable follow-through.	Structured screen; test prioritization across openings.
B04	Hold - evidence gap	Relevant coordination exposure, with limited evidence of analytics ownership.	Request a synthetic work sample before advancing.
B05	Hold - calibration	Strong sourcing research approach; role-operating breadth needs calibration.	Review sourcing exercise; calibrate role fit.

Synthetic handling note: all scenarios and identifiers are invented for corpus production; selection decisions are illustrative only.
