

Structured interview plan

Talent Operations Specialist • Tokyo hybrid • 2 openings • Requisition opened 2026-08-11

Purpose

Evaluate job-related evidence consistently for Requisition Beta. Every candidate receives the same core sequence, prompt set, and scoring scale.

Interview loop

1. Structured screen	30 minutes. Confirm role understanding, operating context, and a concrete workflow example.
2. Work simulation	45 minutes. Candidate maps intake, handoff, escalation, and candidate-update choices from the same fictional scenario.
3. Panel interview	45 minutes. Assess operations design, stakeholder coordination, candidate experience, and judgment.
4. Hiring manager debrief	20 minutes. Compare evidence already recorded; no new unstructured information.

Fairness controls

Use only B01-B05 identifiers. Do not ask about protected characteristics, family, health, prior pay, citizenship beyond role eligibility, or unrelated personal history. Record evidence before calibration; ask follow-ups consistently when a response is incomplete.

Decision linkage

Use 06-beta-question-bank.pdf for prompts, 13-beta-evaluation-matrix.xlsx for weighted scoring, and 07-beta-decision-rationale.pdf for the documented outcome.
