

Question bank and scoring anchors

Shared structured prompts • Requisition Beta • Candidate IDs B01-B05 only

Operations design

Prompt	Tell us about a time you improved an intake-to-handoff process. What triggered the change, who owned each step, and how did you know it worked?
Strong evidence	Defines workflow, decision rights, concrete change, and a measurable review rhythm.
Follow-up	What did you change when a stakeholder could not meet the agreed handoff?

Stakeholder coordination

Prompt	Describe a situation with competing hiring priorities. How did you create clarity and resolve the decision?
Strong evidence	Makes trade-offs visible, assigns an owner, and closes the loop with affected partners.
Follow-up	What would you document so the decision remains consistent next time?

Candidate experience and judgment

Prompt	How would you maintain timely, equitable candidate updates when an interview loop slips?
Strong evidence	Uses a clear update cadence, access-aware communications, and escalation triggers without overpromising.
Follow-up	What information would you avoid collecting because it is not necessary for the job?

Scoring instruction

Score 1-5 only against observable evidence. Apply the same follow-up rule to each candidate. Write paraphrased notes without names, employers, contact details, or compensation history.
