

Investigation roadmap

Civic Ledger | Story Alpha and Story Beta 2026 | desk 2026-08-22 | verified 2026-08-19

Purpose

This roadmap sequences verification for two procurement files with documented gaps. The gaps are not proof of wrongdoing. The objective is to establish what the public record can and cannot support before publication.

Evidence plan

Track	Known record	Next record request	Editorial checkpoint
Alpha	Alpha-17 Project Lantern; 240 kits; 1,248,000 fictional Civic Credits.	Missing quote; 2026-05-28 / 2026-05-30 date history.	State the gap; do not infer motive.
Beta	Beta-09 Route Prism; 96 units; 684,000 fictional Civic Credits.	Routing record for 2026-07-02 amendment / 2026-07-05 log.	State the gap; do not infer motive.

Sequence

1. Review FOIA batch 17 boundaries: Alpha record CL-SA26-FOIA-17 received 2026-08-14 (48 pages) and Beta record CL-SB26-FOIA-17 received 2026-08-15 (31 pages).
2. Submit focused public-record follow-ups for the missing Alpha quote, evaluation record, amendment routing, and date histories.
3. Send written fairness questions that name the exact date discrepancies and ask for documentary support.
4. Update the evidence table; separate confirmed facts, agency explanations, and remaining open questions.
5. Publish only a document-supported account, prominently noting any unresolved gap.

Publication threshold

Proceed only when every factual statement is traceable to the supplied synthetic record or a documented response. If a discrepancy remains, report it as an unresolved record gap rather than a finding of wrongdoing.
