

Item Writing Quality Guide

Maple Learning | 2026-09-14 | Synthetic instructional-design reference

Purpose

Write assessment items that elicit observable evidence of learning. All item IDs are synthetic and are used only in the Maple Learning snapshot.

Quality checks

- State one measurable decision or action in the prompt.
- Use only course context supplied in the item; do not depend on external copyrighted materials.
- Align each response to E 6, R 6, O 4, and F 4 for a maximum of 20 points.
- Review wording for one clear interpretation and an accessible reading load.

Assignment alignment

Assignment	Assessment emphasis
A-101 Evidence Map	Evidence selection and explanation
A-102 Source Comparison	Evidence selection and explanation
A-103 Claim-Evidence-Reasoning Brief	Evidence selection and explanation
B-201 Scenario Map	Evidence selection and explanation
B-202 Model Test	Evidence selection and explanation
B-203 Design Critique	Evidence selection and explanation

Review release rule

Publish an item only after it has a stable synthetic item ID, an assignment mapping, a response mode, and a documented rubric alignment. Do not include learner names, contact details, credentials, or real grades.
