

Rubric Design Reference: One 20-Point Evidence Frame

Maple Learning | snapshot 2026-09-14 | Course Alpha 2026 Term 1 | Course Beta 2026 Term 2 | 36 synthetic learners | Evidence E6 + Reasoning R6 + Organization O4 + Format F4 = 20

Purpose

A rubric should describe observable work, not a learner identity or a hidden preference.

Four dimensions

Use Evidence E6, Reasoning R6, Organization O4, and Format F4. Together these visible dimensions make a 20-point rubric.

Calibration prompt

Review a fictional response fragment, name the visible evidence, and decide which descriptor would help a next revision. Do not record individual learner results in this reference.

Shared assignment vocabulary

ID	Original synthetic assignment title
A-101	Evidence Map
A-102	Source Comparison
A-103	Claim-Evidence-Reasoning Brief
B-201	Scenario Map
B-202	Model Test
B-203	Design Critique
