

Maple Learning | B-202 Model Test

Test Focus

Make predictions based on input, compare with observation, and revise your thinking using evidence and reasoning.

Instructions

1. Read the scenario in each row.
2. Write your prediction in the second column.
3. Record what you observe.
4. Revise your idea and explain why.

Use complete sentences and clear reasoning. _____

Input	Prediction	Observation	Revision
1. A sealed container has ice cubes at -10°C. It is placed in a room at 20°C. What will happen to the ice over time? 			
2. A plant is placed near a window. The pot is turned 90° every day for one week. What change do you predict will occur? 			
3. Two identical cups are filled with the same amount of water. Cup A is left uncovered. Cup B is covered. Which cup will have less water after 24 hours? 			
4. A metal spoon is placed in a cup of hot water. The handle remains outside the cup. What will you notice about the spoon after a few minutes? 			

Evidence E6 | Reasoning R6 | Organization O4 | Format F4 = 20
