

Synthetic cohort feedback summary

Maple Learning | Course Beta 2026 Term 2 | 2026-09-14 | synthetic cohort 36 | rubric 20 (E6/R6/O4/F4)

Assignment focus: B-201 Scenario Map, B-202 Model Test, B-203 Design Critique.

Cohort signal: evidence labels are usually present; revision notes are most useful when they name one next test.

Quality check: all records use synthetic IDs ML26-S001 through ML26-S036 and rubric points E6/R6/O4/F4.

Instructional response: model a compact claim-evidence-reasoning sequence before the next practice cycle.

Fictional Maple Learning internal teaching artifact; no real grades or contacts.
