Course Alpha 2026 Term 1 and Course Beta 2026 Term 2

This attachment supports instructional planning for a synthetic cohort of 36 learners. It contains no personal records, learner results, or contact details. Both courses use the six shared assignment IDs and an E6/R6/O4/F4 rubric out of 20 points.

Rubric structure

Dimension	Evidence focus	Points
E	Evidence is specific and relevant.	6
R	Reasoning connects evidence to the claim.	6
O	Organization supports a readable learning sequence.	4
F	Format is accessible and fit for the activity.	4

Synthetic cohort reference

The following identifiers name the complete synthetic Maple Learning cohort. There are exactly 36 identifiers, ML26-S001 through ML26-S036. They are planning labels only.

Use note

Use these identifiers consistently when designing examples, exports, and learning activities. Do not attach names, contact information, credentials, or performance records. The shared rubric remains E6, R6, O4, F4, for 20 points across A-101 Evidence Map, A-102 Source Comparison, A-103 Claim-Evidence-Reasoning Brief, B-201 Scenario Map, B-202 Model Test, and B-203 Design Critique.
