

2026 07 13 Assessment Defensive Testing Assurance Report Pdf Text S009384

Artifact p03-full-009384 | Source p03-src-009384 | Assigned period: 2026-07-13

Review question

How should this dated defensive-test intake review use the assigned 2026-07-13 record without overstating dependency evidence?

Procedure

Analyst will confirm that the intake date is carried separately from the dependency date. The delimiter-aware local foundation record p03-full-000048 remains the fact authority; its values are retained as supplied. This is a bounded synthetic GRC review, not a penetration test, live-system assessment, or Kio claim.

Dependency source ID	p03-full-000048
Dependency source path	security/pentest-reports/foundation/data/2026-07-14-assessment-defensive-testing-evidence-metrics-tsv-s00048.tsv
Assigned period	2026-07-13
Dependency source period	2026-07-14
Dependency fact summary	Dependency artifact p03-full-000048 (source p03-src-000048) identifies the metric privileged roles reviewed with a reported value of 48 records.
Control context	Aegis Control AC-27
Risk disposition	RISK-031 remains residual Medium after compensating review

Observation and finding

The source record is fact authority. The assigned date organizes review work but does not alter source authority. It does not erase the documented assurance gap: incomplete quarterly privileged-access review evidence created RISK-031; residual risk remains Medium after compensating review.

Accountable action

GRC Evidence Steward will file an intake note that retains both dates. Preparer and reviewer roles remain separated for exception disposition. Corpus production and QA establish no Kio indexing, history, chunks, search quality, or performance claim.
