

# 2026 07 14 Assessment Control Validation S004243

Artifact p03-full-004243 | Assigned reporting period: 2026-07-14 | AC-27 / RISK-031

## Assurance purpose

This synthetic assurance report assesses control-validation repeatability for the named review context. Its evidence test is to evaluate whether another reviewer could reproduce the control-validation conclusion from the cited measures and evidence reference. It is a documentation-focused, defensive record for Cobalt Harbor Systems and does not claim a live test, intrusion, compromise, or operating-effectiveness result.

## Direct foundation source

This report is assigned to 2026-07-14. Its direct foundation is p03-full-000847 (2026-07-14-assessment-control-validation-evidence-metrics-tsv-s000847.tsv), whose source review date is 2026-07-14. The source records control-validation, case CASE-260713-184, and evidence reference EV-184-08. The assigned period and source date are intentionally shown separately.

## Recorded foundation measures

| Measure                   | Value | Unit    |
|---------------------------|-------|---------|
| Privileged Roles Reviewed | 48    | records |
| Timely Attestations       | 47    | records |
| Evidence Completeness     | 24    | items   |

## Review analysis

Finding: the record is repeatable as a documentary test when provenance is preserved. The direct record permits a verifier to test control-validation repeatability by tracing EV-184-08 to a bounded AC-27 conclusion. The review retains the distinction between 47 timely attestations and final completion after compensating review where those measures appear in the foundation; no prior timing is rewritten.

## Recommended disposition

Disposition: retain a repeatability confirmation with the workpaper. Retain the source-supported conclusion with the RISK-031 treatment record and document independent preparer and reviewer roles for any exception disposition. This report is fully fictional, uses no sensitive operational data, and makes no Kio indexing, history, search, chunk, or performance claim.
