

2026 07 14 Assessment Control Validation Assurance Report Pdf Text S008763

Artifact p03-full-008763 | Source p03-src-008763 | Assigned period: 2026-07-14

Review question

How should this control-validation reconciliation review use the assigned 2026-07-14 record without overstating dependency evidence?

Procedure

Analyst will reconcile the assigned date against the source metric labels and their measurement unit. The delimiter-aware local foundation record p03-full-000685 remains the fact authority; its values are retained as supplied. This is a bounded synthetic GRC review, not a penetration test, live-system assessment, or Kio claim.

Dependency source ID	p03-full-000685
Dependency source path	security/pentest-reports/foundation/data/2026-07-15-assessment-assurance-scope-evidence-metrics-tsv-s000685.tsv
Assigned period	2026-07-14
Dependency source period	2026-07-15
Dependency fact summary	Dependency artifact p03-full-000685 (source p03-src-000685) identifies the metric privileged roles reviewed with a reported value of 48 records.
Control context	Aegis Control AC-27
Risk disposition	RISK-031 remains residual Medium after compensating review

Observation and finding

The source record is fact authority. The source supports a dated reconciliation only; it cannot prove remediation completion. It does not erase the documented assurance gap: incomplete quarterly privileged-access review evidence created RISK-031; residual risk remains Medium after compensating review.

Accountable action

GRC Evidence Steward will queue a control-owner confirmation with the dated reconciliation. Preparer and reviewer roles remain separated for exception disposition. Corpus production and QA establish no Kio indexing, history, chunks, search quality, or performance claim.
