

2026 07 14 Assessment Control Validation Assurance Report Pdf Text S009703

Artifact p03-full-009703 | Source p03-src-009703 | Assigned period: 2026-07-14

Review question

How should this dated control evidence linkage review use the assigned 2026-07-14 record without overstating dependency evidence?

Procedure

Analyst will verify that the assigned control-review date remains distinct from the source measurement date. The delimiter-aware local foundation record p03-full-000847 remains the fact authority; its values are retained as supplied. This is a bounded synthetic GRC review, not a penetration test, live-system assessment, or Kio claim.

Dependency source ID	p03-full-000847
Dependency source path	security/pentest-reports/foundation/data/2026-07-14-assessment-control-validation-evidence-metrics-tsv-s000847.tsv
Assigned period	2026-07-14
Dependency source period	2026-07-14
Dependency fact summary	Dependency artifact p03-full-000847 (source p03-src-000847) identifies the metric privileged roles reviewed with a reported value of 48 records.
Control context	Aegis Control AC-27
Risk disposition	RISK-031 remains residual Medium after compensating review

Observation and finding

The source record is fact authority. The linkage is documentary and does not demonstrate implementation quality. It does not erase the documented assurance gap: incomplete quarterly privileged-access review evidence created RISK-031; residual risk remains Medium after compensating review.

Accountable action

GRC Evidence Steward will retain the linkage rationale for AC-27 review. Preparer and reviewer roles remain separated for exception disposition. Corpus production and QA establish no Kio indexing, history, chunks, search quality, or performance claim.
