

2026 07 15 Assessment Assurance Scope Assurance Report Pdf Text S009817

Artifact p03-full-009817 | Source p03-src-009817 | Assigned period: 2026-07-15

Review question

How should this assurance-scope completeness review use the assigned 2026-07-15 record without overstating dependency evidence?

Procedure

Analyst will assess whether the source fields describe the stated assurance scope with enough context. The delimiter-aware local foundation record p03-full-000465 remains the fact authority; its values are retained as supplied. This is a bounded synthetic GRC review, not a penetration test, live-system assessment, or Kio claim.

Dependency source ID	p03-full-000465
Dependency source path	security/pentest-reports/foundation/data/2026-07-14-assessment-assurance-scope-evidence-metrics-csv-s000465.csv
Assigned period	2026-07-15
Dependency source period	2026-07-14
Dependency fact summary	Dependency artifact p03-full-000465 (source p03-src-000465) identifies the metric privileged roles reviewed with a reported value of 48 records.
Control context	Aegis Control AC-27
Risk disposition	RISK-031 remains residual Medium after compensating review

Observation and finding

The source record is fact authority. The fields define a narrow scope signal; absent attributes stay outside the conclusion. It does not erase the documented assurance gap: incomplete quarterly privileged-access review evidence created RISK-031; residual risk remains Medium after compensating review.

Accountable action

GRC Evidence Steward will log the missing-context boundary for evidence set 184. Preparer and reviewer roles remain separated for exception disposition. Corpus production and QA establish no Kio indexing, history, chunks, search quality, or performance claim.
