

# 2026 07 15 Assessment Control Validation S004043

Artifact p03-full-004043 | Assigned reporting period: 2026-07-15 | AC-27 / RISK-031

## Assurance purpose

This synthetic assurance report assesses source chronology check for the named review context. Its evidence test is to test whether the sequence between the assigned report and the source review is transparent to an independent reader. It is a documentation-focused, defensive record for Cobalt Harbor Systems and does not claim a live test, intrusion, compromise, or operating-effectiveness result.

## Direct foundation source

This report is assigned to 2026-07-15. Its direct foundation is p03-full-001167 (2026-07-14-assessment-control-validation-evidence-metrics-csv-s001167.csv), whose source review date is 2026-07-14. The source records control-validation, case CASE-260713-184, and evidence reference EV-184-16. The assigned period and source date are intentionally shown separately.

## Recorded foundation measures

| Measure                   | Value | Unit    |
|---------------------------|-------|---------|
| Privileged Roles Reviewed | 48    | records |
| Timely Attestations       | 47    | records |
| Evidence Completeness     | 24    | items   |

## Review analysis

Finding: the chronology requires an explicit limitation statement before reliance. The direct record permits a verifier to test source chronology check by tracing EV-184-16 to a bounded AC-27 conclusion. The review retains the distinction between 47 timely attestations and final completion after compensating review where those measures appear in the foundation; no prior timing is rewritten.

## Recommended disposition

Disposition: add chronology review to the quality checklist. Retain the source-supported conclusion with the RISK-031 treatment record and document independent preparer and reviewer roles for any exception disposition. This report is fully fictional, uses no sensitive operational data, and makes no Kio indexing, history, search, chunk, or performance claim.
