

2026 07 15 Assessment Control Validation Assurance Report Pdf Text S009851

Artifact p03-full-009851 | Source p03-src-009851 | Assigned period: 2026-07-15

Review question

How should this control-validation date separation review use the assigned 2026-07-15 record without overstating dependency evidence?

Procedure

Analyst will preserve the difference between the assigned validation date and dependency source period. The delimiter-aware local foundation record p03-full-001167 remains the fact authority; its values are retained as supplied. This is a bounded synthetic GRC review, not a penetration test, live-system assessment, or Kio claim.

Dependency source ID	p03-full-001167
Dependency source path	security/pentest-reports/foundation/data/2026-07-14-assessment-control-validation-evidence-metrics-csv-s001167.csv
Assigned period	2026-07-15
Dependency source period	2026-07-14
Dependency fact summary	Dependency artifact p03-full-001167 (source p03-src-001167) identifies the metric privileged roles reviewed with a reported value of 48 records.
Control context	Aegis Control AC-27
Risk disposition	RISK-031 remains residual Medium after compensating review

Observation and finding

The source record is fact authority. The two dates support provenance clarity, not causal interpretation. It does not erase the documented assurance gap: incomplete quarterly privileged-access review evidence created RISK-031; residual risk remains Medium after compensating review.

Accountable action

GRC Evidence Steward will include the date-separation note in the validation record. Preparer and reviewer roles remain separated for exception disposition. Corpus production and QA establish no Kio indexing, history, chunks, search quality, or performance claim.
