

2026 07 20 Assessment Assurance Scope S000617

Artifact p03-full-000617 | Assigned reporting period: 2026-07-20 | AC-27 / RISK-031

Assurance purpose

This synthetic assurance report assesses review-gap follow-up handoff for the named review context. Its evidence test is to test whether a follow-up distinguishes independent acceptance from the preparer evidence record. It is a documentation-focused, defensive record for Cobalt Harbor Systems and does not claim a live test, intrusion, compromise, or operating-effectiveness result.

Direct foundation source

This report is assigned to 2026-07-20. Its direct foundation is p03-full-000806 (2026-07-13-assessment-review-gap-evidence-metrics-csv-s000806.csv), whose source review date is 2026-07-13. The source records review-gap, case CASE-260713-184, and evidence reference EV-184-15. The assigned period and source date are intentionally shown separately.

Recorded foundation measures

Measure	Value	Unit
Privileged Roles Reviewed	48	records
Timely Attestations	47	records
Evidence Completeness	24	items

Review analysis

Finding: the source identifies a handoff object but not a completed closure. The direct record permits a verifier to test review-gap follow-up handoff by tracing EV-184-15 to a bounded AC-27 conclusion. The review retains the distinction between 47 timely attestations and final completion after compensating review where those measures appear in the foundation; no prior timing is rewritten.

Ordered evidence test and counterexample

First trace the review-gap source to the named evidence reference, then examine whether the follow-up asks for new evidence or merely repeats the preparation conclusion.

Counterexample: a later report represents a retained source as a completed gap closure. The test fails unless a separate independent acceptance record is present.

Observation: the handoff object is identifiable but acceptance is not implied. The review coordinator obtains that acceptance note before closing follow-up.

Recommended disposition

Disposition: the review coordinator obtains an acceptance note before closure. Retain the source-supported conclusion with the RISK-031 treatment record and document independent preparer and reviewer roles for any exception disposition. This report is fully fictional, uses no sensitive operational data, and makes no Kio indexing, history, search, chunk, or performance claim.
