

# 2026 07 20 Assessment Review Gap S000726

Artifact p03-full-000726 | Assigned reporting period: 2026-07-20 | AC-27 / RISK-031

## Assurance purpose

This synthetic assurance report assesses post-review evidence retrieval for the named review context. Its evidence test is to test whether a later reviewer can retrieve the relevant bounded evidence from the cited reference alone. It is a documentation-focused, defensive record for Cobalt Harbor Systems and does not claim a live test, intrusion, compromise, or operating-effectiveness result.

## Direct foundation source

This report is assigned to 2026-07-20. Its direct foundation is p03-full-000824 (2026-07-15-assessment-defensive-testing-evidence-metrics-csv-s000824.csv), whose source review date is 2026-07-15. The source records defensive-testing, case CASE-260713-184, and evidence reference EV-184-09. The assigned period and source date are intentionally shown separately.

## Recorded foundation measures

| Measure                   | Value | Unit    |
|---------------------------|-------|---------|
| Privileged Roles Reviewed | 48    | records |
| Timely Attestations       | 47    | records |
| Evidence Completeness     | 24    | items   |

## Review analysis

Finding: the locator supports retrieval but needs a documented retrieval result. The direct record permits a verifier to test post-review evidence retrieval by tracing EV-184-09 to a bounded AC-27 conclusion. The review retains the distinction between 47 timely attestations and final completion after compensating review where those measures appear in the foundation; no prior timing is rewritten.

## Recommended disposition

Disposition: perform a safe retrieval check and retain its outcome. Retain the source-supported conclusion with the RISK-031 treatment record and document independent preparer and reviewer roles for any exception disposition. This report is fully fictional, uses no sensitive operational data, and makes no Kio indexing, history, search, chunk, or performance claim.
